Response to Arguments

9. Applicant's arguments with respect to claims 1-3 and 5-9 are have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

10. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

11. Claims 1-3 and 5-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Blackburn (5190533).

Blackburn relates a cover device comprising a lengthwise strip of fabric (28) (col. 6, lines 32-34) having a rectangular structure as is well known in the diaper are and as shown in figure-1, a first and second elastic strips (35, 35') are hemmed along the first and second lengthwise edge of the fabric with a gathered configuration (col. 6, lines 46-49), a strip of pressure sensitive adhesive tab (39) is adhered to said strip of fabric

Art Unit: 1772

substantially along said first lengthwise edge and a liner (39b) releasably covers said adhesive surface (39a) (col. 6, lines 49-53).

The preamble recitation "A cord cover" has not been given patentable weight because it has been held that a preamble is denied the effect of a limitation where the claim is drawn to a structure and the portion of the claim following the preamble is a self-contained description of the structure not depending for completeness upon the introductory phrase. *Kropa v. Robie*, 88 USPQ 478 (CCPA 1951).

The intended use phrases such as "for use", "selectively removable", "to be selectively adhered", etc. have not been given any patentable weight because said phrases are not found to be of positive limitations.

The adhesive tab is reusable a limited number of times because it adheres to a reusable surface. Further, it is well known in the diaper art to use reusable adhesive tabs as evidenced by Rogers (USP 5569229, in col. 3, lines 5-10).

As shown in figure-1, the adhesive tape is discontinuous.
